BioTemps®	5 days	screw-retained over implant.....	6 days
with cast-metal frame or cast-metal reinforcement over implant.....	6 days	extra cost for rush services	1, 2 or 3 days

TERMS AND WARRANTY INFORMATION

TERMS: Cost of collection of any account will be paid by the customer. **All accounts are payable within 30 days of statement date. Accounts not paid within the stated terms will be subject to COD status and a late charge of 2 percent of the unpaid balance.** Prices subject to change without notice. Rx must be enclosed with original case submission.

LIMITED WARRANTY/LIMITATION OF LIABILITY. BDL Prosthetics ("the lab") warrants that all dental devices (a "device") are made according to your specification and approval in the belief that the device will be useful and MAKES NO OTHER WARRANTIES INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Subject to the return of a device that is placed and then fails, the lab will repair or replace the device without charge for the cost of materials and workmanship or refund the original price paid, at the lab's option, as follows: (1) screw-retained implant abutments up to 20 years (including replacement of a device that was made by the lab that was attached to said abutments and including an Inclusive® Tapered titanium dental implant upon request at no extra charge); (2) porcelain to metal, all ceramic, all metal, single-unit inlay, onlay and crown composite resin final prosthetics, and screw-retained crowns and implant bars, up to seven years; (3) composite resin bridges (excluding Maryland and inlay/onlay bridges) up to five years; (4) Transition Crowns and Bridges® up to two years; (5) thermoformed appliances and splints if the failure is due to defects in materials or workmanship, provisionals, composite resin Maryland and inlay/onlay bridges, up to six months; (6) Smile Transitions™ and all other dental devices up to 30 days if the failure is due to defects in materials or workmanship. This Warranty is exclusively for your benefit, is not transferable and does not extend to any patients. You agree to pay all other costs of adjustment, repair and replacement of a device. Except where prohibited by law, the lab WILL NOT BE LIABLE FOR ANY LOSS OR DAMAGES ARISING FROM THE USE OF A DEVICE, WHETHER DIRECT, INDIRECT, SPECIAL, INCIDENTAL OR CONSEQUENTIAL, regardless of the theory asserted, including warranty, contract, negligence or strict liability and if such disclaimer is not permitted by law, the duration of any implied warranty is limited to 90 days from the date of delivery. In the event of a dispute and absent an amicable resolution the parties mutually agree to waive class actions in favor of mandatory individual arbitration of claims under this limited warranty in and in accordance with the laws of California. The lab does not guarantee the performance of independent carriers.

BIOTEMPS RELINE INSTRUCTIONS

For best results, reline BioTemps with a methyl methacrylate acrylic reline material (i.e., Jet® by Lang, Coldpac by Yates Motloid or Palavit 55® VS by Heraeus Kulzer). Other reline materials should be avoided. However, if used, mechanical undercuts must be cut into the abutment shells for better retention of the reline material.

- Try in restorations. If any adjustment is needed to seat the restoration, use a low-speed carbide or composite finishing bur.

- Rinse with water, and dry completely.

- Apply a thin layer of vaseline to the outer surface of restoration to prevent excess reline material from sticking.
- Reline BioTemps by blocking out any undercuts on the preparations.

- Mix acrylic per manufacturer's instructions, and fill abutment shells between 1/2 to 3/4 full. After the surface of the acrylic material loses its shine, carefully place the BioTemps over the preparations.

- Do not allow the reline material to fully cure on the preparations due to heat generation, which may cause injury to the pulp.

- Gently work the BioTemps on and off the preps, allowing them to bench cure.

- Trim away any flash or excess acrylic using a plastic grinding disc.

- BioTemps can be polished with pumice and polishing paste or resealed with a light-cured glaze (i.e., Palaseal®, Heraeus Kulzer).

- Cement BioTemps using a non-eugenol temporary cement, like ZONE® by DUX Dental. If higher retention is needed, Neo-Temp® by Water Pik can be used.
